

GUARDIAN SPECIES:

# LADY BUGS

FIELD PHOTOS:

FIELD NOTES:

▶ Lady Bugs add happiness and luck to your garden...and a bit of color too!

▶ A Lady Bug's favorite food is aphids: they eat about 50 per day.

▶ Lady Bugs should be released in the evening to adjust to their new home.

▶ Lady Bugs are an important part of a well-balanced garden

*Sap-sucking aphids feed in clusters on new plant growth.*

*This is what the lady bug larva look like. Don't be afraid! They're also beneficial predators.*

*It's no wonder lady bugs are a favorite of people all over the world. They're so cute and helpful at the same time!*
